

MOUTH MIRRORS DR. FABRIZIO COMELLA

SPECCHIETTO DR. FABRIZIO COMELLA

DROP SHAPE MIRROR

The mirror is an indispensable tool for inspecting the oral cavity, soft tissues, anterior and posterior teeth and for all kind of conservative treatment. An improvement to these standard procedures has been achieved with the introduction of our new "drop shape" mirror which facilitates the control of the soft tissues, better protects the tongue wall and above all it offers a larger view of the superior molar portion and of the oral cavity in general. Furthermore the elongated "drop shape" guarantees a wider reflection surface and therefore a major visibility of the oral cavity. *(Protected by international patent)*

SPECCHIETTO A GOCCIA

Lo specchietto odontoiatrico rappresenta lo strumento necessario per l'ispezione del cavo orale, dei tessuti molli, denti anteriori e posteriori e come protezione nelle manovre conservative. Una miglioria per tutte queste attività è ottenuta con l'introduzione del nuovo specchietto "a goccia" il quale agevola il controllo dei tessuti molli, protegge la lingua e offre una più ampia retrospettiva del versante vestibolare. In aggiunta, il nuovo specchietto "a goccia" garantisce una maggior luce riflessa aumentando così la luminosità del cavo orale. *(Protetto da brevetto internazionale)*
